

The Virtual FlyBox – Blue and Eagle River Edition

The Virtual FlyBox is like having an inexpensive fly fishing guide in your back pocket ... only you have to tie the knots.

An iPhone application to help you select the correct fly patterns for fishing Colorado's Blue and Eagle Rivers.

Available on the iTunes App Store June 20, 2014, The Virtual FlyBox – [Blue and Eagle River](#) Edition was developed to help make some sense out of the details of fly entomology and to apply that information to select the correct fly patterns for Colorado's Blue and Eagle Rivers.

The Virtual FlyBox identifies fly patterns based upon location, the season and time of day. It was created to give the fly fisherman / woman just the right amount of fly entomology with the purpose of helping them become a more successful fly fisherman.

The Virtual FlyBox runs on iPhones, iPads and an iPod Touch with iOS 7 or above.

For more information and to see a video demonstration, visit us on the [web](#) at thevirtualflybox.com or search for "Virtual FlyBox" on the [iTunes App Store](#).

Watch for additional editions coming soon and take a look at our [South Platte](#) and [Arkansas](#) River editions too.
