

The Virtual FlyBox – South Platte Edition

The Virtual FlyBox is like having an inexpensive fly fishing guide in your back pocket ... only you have to tie your own knots.

An iPhone application to help you select the correct fly patterns for fishing Colorado's South Platte River.

Available on the iTunes App Store April 13, 2014, The Virtual FlyBox – South Platte Edition was developed to help make some sense out of the confusing details of fly entomology and to apply that information to select the correct fly patterns for the Colorado South Platte River.

The Virtual FlyBox identifies fly patterns based upon location, the season and time of day. It was created to give the fly fisherman / woman just the right amount of fly entomology with the purpose of helping them become a more successful fly fisherman.

The Virtual FlyBox runs on iPhones, iPads and an iPod Touch with iOS 7 or above.

For more information and to see a video demonstration visit us at TheVirtualFlyBox.com or visit us on the [iTunes App Store](#).

Watch for additional editions coming soon.
